Introduction

QRP learning software as a service (SaaS) is a cloud software platform that can be used in IE, Google Chrome, Firefox, Apple Safari, as well as on iPads, Android tablets, and smartphones, to increase learners' skills. Features include:

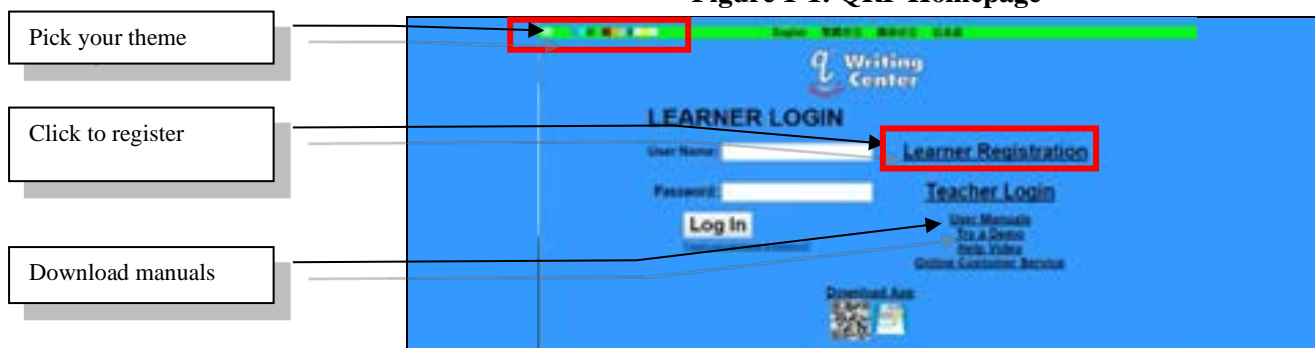

- **QRP** is totally online, in the cloud, no need to install or download software. In addition, after logging in, the user can download the **QRP** ebook.
- Learners can change interface language at any time for a localized experience or to practice more English use.
- learners can complete assignments from anywhere, no need to use a computer lab because work can be accessed through any wireless connection, such as smartphones, tablets, and notebooks.
- All assignments are automatically saved and turned in to the teacher, no need to upload, email, or print out homework.
- For any assignment that is due within the next two days, QBook Writing Center will automatically send an email reminder to every individual learner.
- Each essay type includes Help Notes, containing built-in writing guidelines on writing style, content, and format with examples to guide learners in practicing writing.
- **QRP** provides a Help Video with a 60-second demonstration on every page.
- All learners can practice writing simultaneously.
- **QRP** increases the instructional value of the teacher's effort. After teacher assessment, learners can view others' contents, grades, and teacher feedback; in fact, learners can learn by seeing what others have done.
- Big Data Analytics: Available error statistics for each assignment enable the individual learner to accurately target weaknesses to improve. Learners can collect, track, and analyze their own writing details, helping to understand and overcome learning bottlenecks.
